I'm a truck driver that travels up & down the highway. I used to listen to the CB radio for road reports & weather on road conditions, but nowadays all you get is fights & foul mouth people cussing one another out. A friend of mine told me about the XM radio and all the stations that comes with it including the station Hanks place that plays all the classic country music. So I went & bought an XM & found not only do they play good country, but also give good reports on bad accidents, road conditions & closures from drivers who fall apoud them & then call it in to "HANKS PLACE" so all other drivers are aware of the problem & don't get caught in the middle of it. IT is a whole lot quicker than listin' to the AM-FM & waiting every 1/2 hr. for such a report & get caught in the middle of it. Now you have LOBBYISTS who wants to stop all of this. I'm asking for support to leave well enough alone. Someday it may be a benifit to you to!!!!
